

# Hiram Gabriel - Fullstack Developer

(+52) 633 409 6902

rusty3031@gmail.com

[LinkedIn](#) [Github](#)

## SKILLS

Frontend: Svelte, React, Next.js, Typescript, Tailwind  
Backend: Node.js, Nest.js, Express.js, MongoDB, PostgreSQL, Docker, Redis  
Cloud: AWS(S3, EC2, dynamoDB, API Gateway, lambdas)

## EXPERIENCE

### Atrato— *Fullstack Software Engineer* (August 2024- Present)

- Building and maintaining RESTful APIs using Node.js with TypeScript
- Developing and maintaining back-end systems using databases with MySQL
- Implement automated testing to ensure quality and scalability
- creation and maintenance of functionalities in the UI with react and typescript

### Vopper Company — *Lead Backend Developer* (January 2024- August)

- Switching from ExpressJS to Nestjs with microservices using RabbitMQ as message broker and redis cache
- implementation of hexagonal architecture in project
- creation and implementation of pipe for CI/CD automation
- creation of new services using nestjs, redis, postgresql and orchestration with Kubernetes
- deployment and configuration of VPS server in digitalocean and implementing a process manager (PM2) and load balancer with nginx
- I defined deadlines and tasks for the team, reviewed public relations and advised other engineers.

### LinkTIC — *Software Developer* (August 2023 - January 2024)

- version migration in svelte 3 project and webpack to svelte 4 with turbopack and typescript.
- implementation of functionalities to old project using sveltekit and supabase
- Collaboration in creating endpoints for the backend of another company project using expressjs, typescript and postgresql with docker

### TECNM (Campus Sonora)— *Associate College Professor* (February 2023 - December 2023)

- I provided a workshop where I taught students how to develop full web applications with nodeJS, ExpressJS, Nestjs, Svelte and MongoDB. Thus adapting my teaching methods to meet your individual needs. It is a rewarding and exciting experience that allows me to effectively transmit knowledge. We also develop and implement applications successfully to small and medium-sized local businesses as practice for students.
- creation of pipelines for automation in (CI/CD) deployments.

### Freelancer — *Full stack Developer* (March 2020- February 2023)

- Create robust systems for clients and companies such as gynecologists, transportation companies, product suppliers, parcel companies, etc. using technologies such as: express, typescript, mysql, react, next, tailwind.
- I developed landing page for campaigns using sveltekit, tailwind, typescript, bootstrap v4

## EDUCATION TAKE ACTION

Computer Engineering — TECNМ - Agua Prieta, Sonora

## CERTIFICATIONS

Devtalles — Course Nestjs scalable backend development with node
